CNC Operator/Machinist

Are you ready to join our team at Vesta? We are currently expanding our team and looking for our next key member.

Some responsibilities of a CNC Operator/Machinist include:

- Preparing and operating CNC machines to perform tasks such as drilling, grinding, milling, etc.
- Understanding specifications of task at hand and desired result by reading blueprints, mechanical drawings, etc.
- Translating instructions into computer commands, so machines can perform the correct function.
- Preparing and loading raw materials and parts onto the machines.
- Preparing a test run to check if the machines produce outputs according to specifications.
- Setting machines to complete full cycles to fabricate large number of parts.
- Supervising the machines while they execute the tasks and making necessary adjustments to produce a better result.
- Inspecting and measuring finished products and comparing them with requirements to determine if process has been completed properly.
- Checking and maintaining machinery daily to ensure functionality.

If you have the experience listed above and are looking for your next exciting career, we want to hear from you! All applications will be received in confidence.
